

Fight wheat midge in your fields.

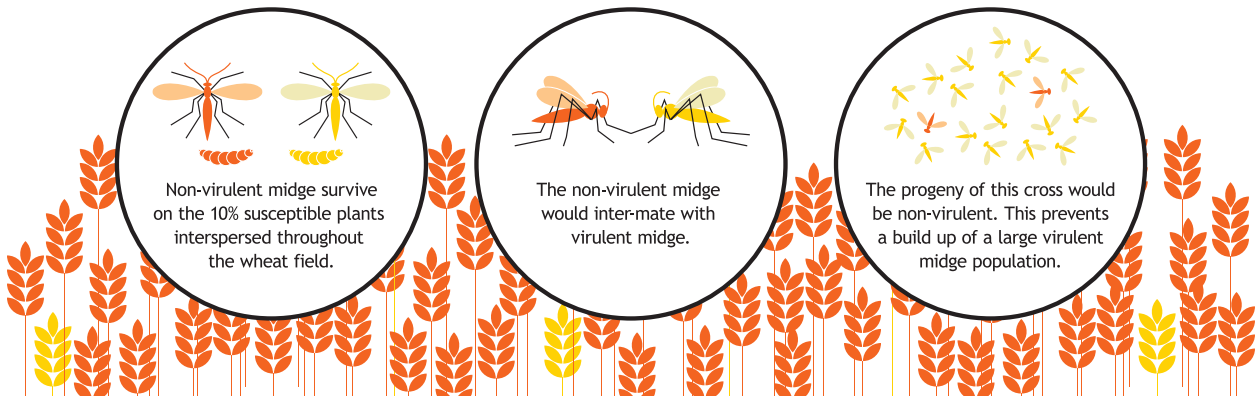

Plant. Protect. Preserve. That's the thinking behind new midge tolerant wheat varieties – and the reason to put an interspersed refuge system to work fighting wheat midge on your farm. Maintaining this varietal blend of tolerant and susceptible wheat is a simple step that is vital to preserving the technology, while protecting your yields and grade.

Ask us about the Midge Tolerant Wheat Stewardship Agreement or visit www.midgetolerantwheat.ca to learn more.

WITHOUT AN INTERSPERSED REFUGE SYSTEM,
MIDGE TOLERANCE COULD BREAK DOWN WITHIN 10 YEARS.

AN INTERSPERSED REFUGE SYSTEM COULD EXTEND THE LIFE
OF MIDGE TOLERANCE TO 90 YEARS OR LONGER.

Virulent Midge Tolerant Wheat Non-virulent Midge Susceptible Wheat

Funding for this project has been provided by Agriculture and Agri-Food Canada through the Advancing Canadian Agriculture and Agri-Food (ACAAF) program. The ACAA program is delivered in Saskatchewan by the Agriculture Council of Saskatchewan and in Alberta by the Agriculture and Food Council of Alberta.
